Subject: RE: Update on latest water sampling data from Dimock, Pa.

Hi Roy,

I count <u>28</u> wells in the list headed "Dimock week 1 and 2." Sample dates are Jan. 23-Feb.3. But your note says the results are from the 2nd set of sampling at <u>20</u> wells. Can you explain?

Also, the document says yellow-highlighted sample results (all of which I note are below the EPA and DEP MCLs) are referred to an EPA toxicologist for further review. What does that mean?

Thanks, Lorraine

Subject: Update on latest water sampling data from Dimock, Pa.

EPA has completed and shared with residents and Pennsylvania state officials the second set of sampling at 20 private drinking water wells in Dimock, Pa. This set of sampling did not show levels of contaminants that would give EPA reason to take immediate action. EPA remains committed to providing Dimock residents with the best available data and information on the quality of drinking water as expeditiously as possible.

For more information on the sampling results, visit: http://www.epa.gov/aboutepa/states/pa.html Roy Seneca
